

4 Memory Presets

The 4 preset buttons (5) allows the radio to memorize 4 stations. To set one of the 4 presets: first select the FM station you want to save, then hold down one of the presets for approximately 5 seconds. The preset number on the LCD screen (C) will appear and then flash once to indicate that it has been memorized.

Audio Out-Port

The Audio Out-Port on the FM Radio (2) is 3.5mm and is intended for standard stereo headphones with a 3 pole (i.e. 2 ring) audio jack. The audio may not play properly if using other types of headphones for example, mono or 4 pole audio jacks.

Volume

To change the volume, press the UP or DOWN volume buttons on the side of the unit (3). The volume indicator on the LCD screen (D) will adjust accordingly.

Antenna

The FM radio utilizes the stereo headphones for its antenna. We recommend you only use the stereo headphones offered by Source FM to ensure a quality FM reception and listening experience.

Lock Feature

To lock the tune and seek capabilities on the radio while leaving the power, volume and preset buttons still functional. First press down and hold the power button, then press and hold preset number 4. After holding both down for 3 seconds the radio will lock or unlock.

Lanyard

For your convenience we include a lanyard that you can attach at the top of the unit. First, take the lanyard and thread the thin loop through the hook on top of the FM radio (7). Then once the loop is through the hook, run the lanyard through the loop and pull it tight to securely attach the lanyard to the FM radio.

Accessories Included

- In-Ear Stereo Headphones
- Lanyard
- Instruction Booklet
